

Cafe meeting #1

Group 1, research activities

- PhD-project Federicia waste water treatment (case study)
- Include waste from households, restaurants, industry
- Include all aspects of the project
 - Technical, economical, environmental, agronomical
 - Validation, data collection
- Start PhD course in June 2014
 - Make a joint plan

Group 2, teaching elements, milestones, etc.

- Model development course
 - Project partners
 - University acceptance
- Biogas managers training course by the end of the project
- Msc studies
 - Slurry at biogas plants
 -

Group 3

other partners and networks

- List and contact other EU-projects, e.g.
 - Animal change reduction GHG farm houses
 - Fertiplus, organic fertilizers from organic waste
 - Inemad, nutrient and energy management via anaerobic digestion
 - Interreg projects (DK-DE, DE-NL)
- Exchange reports, e.g. BTG report on Dutch Biogas plants, Gasunie report on biogas certification
- Joint papers regarding e.g. International constraints
- Biological farmers, improved N-efficiency
