

WP 1: The conceptual model

Ida Græsted Jensen

Department of Management Engineering

e-mail: idje@dtu.dk

Introduction

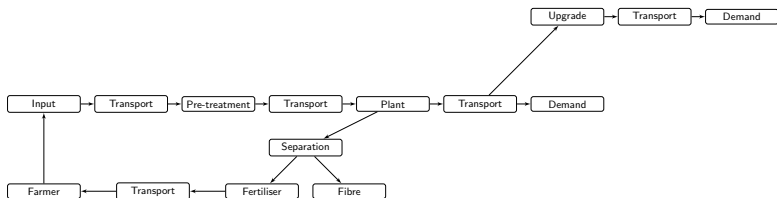

Objective:

- ▶ Optimise the production of biogas while ensuring economic feasibility for all partners

What will be included:

- ▶ Supply
- ▶ Transport
- ▶ Storage
- ▶ Pre-treatment
- ▶ Plant technologies
- ▶ Fertiliser
- ▶ End use

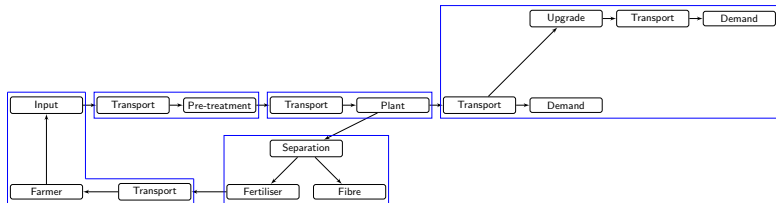

Overview

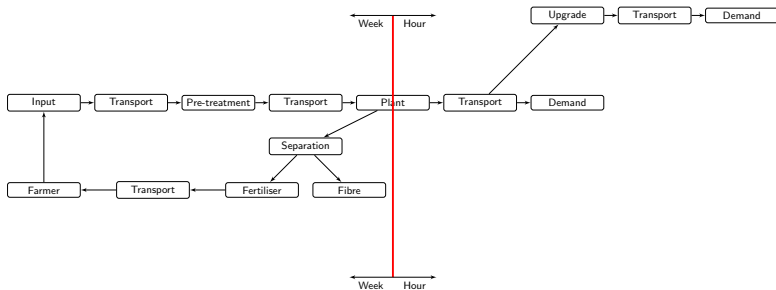

For simplification, storage is not shown in the model.

Value chain

Feasibility will be tested on the shown elements

Time resolution and uncertainties

Included uncertainties:

- ▶ Prices: long term and short term
